
Spectrographic Helium D3 observations with SST/TRIPPEL
Line Formation
Limb observation with SST and IRIS
Surge
Filament
Active region
Medium bright point
Post-flare ribbons
Active limb
Joint high temperature observation of a small C6.5 solar flare with IRIS/EIS/AIA
Fe XXI Gaussian line profile fitting
IRIS/EIS/AIA Joint Observation 3 Feb 2014
Evolution of the flare
Emission measure and densities during the gradual phase
Summary of results
