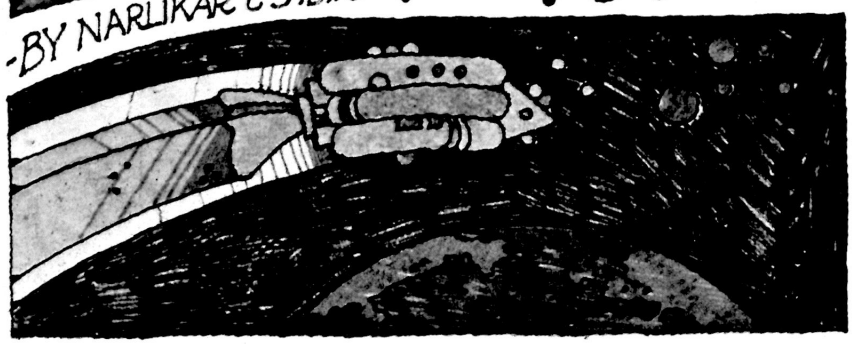
ASTRONOMY THRU THE AGES

-BY NARLIKAR & SABIR



Earth, 850 AD. Emperor Bhoja was amongst those who ruled India, a country that could boast of a highly sophisticated culture. Europe was still underdeveloped. And the Americas?
Well, whoever had heard of those? Meanwhile, 1150 light years away on planet Ziao of star S in the Ursa Major, an Earth-bound space-craft readies for take-off. Ziaonians, an adventurous lot, harness the marvels of their science and technology for galaxy trotting.

PROF. SEPT GOOROO

specialises in the studies of the Solar System and is the think-tank and trouble-shooter of flight 567 to the Solar System. He has trained several cosmonauts and was instrumental in starting the Earth language institute on Ziao.

SING FUNF

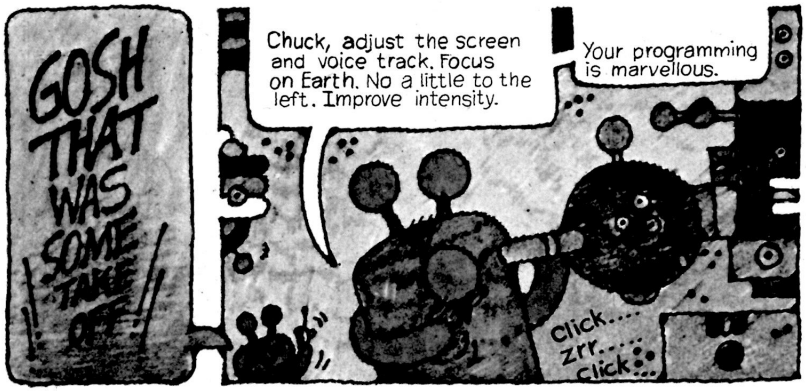
fun loving, space-music addict, rocketry engineer, is Captain of the flight.

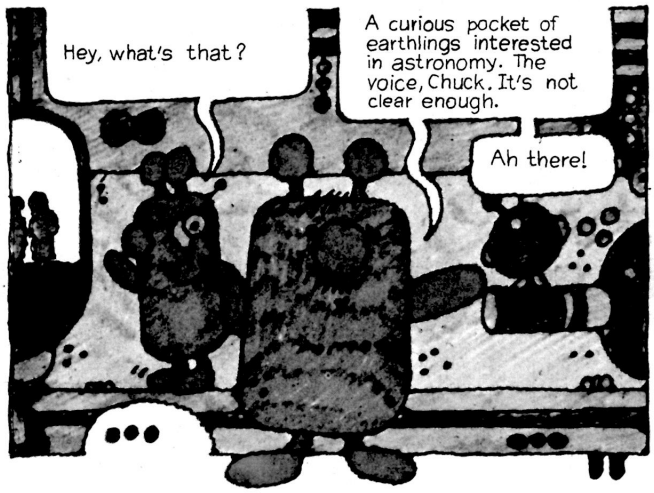
AARI BECO

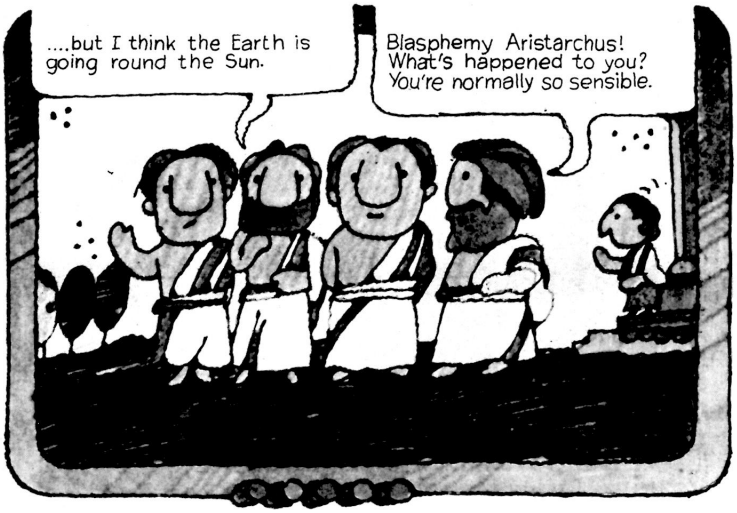
biochemist-cum-holographer, is studying earthlings' diets and their feeding habits.

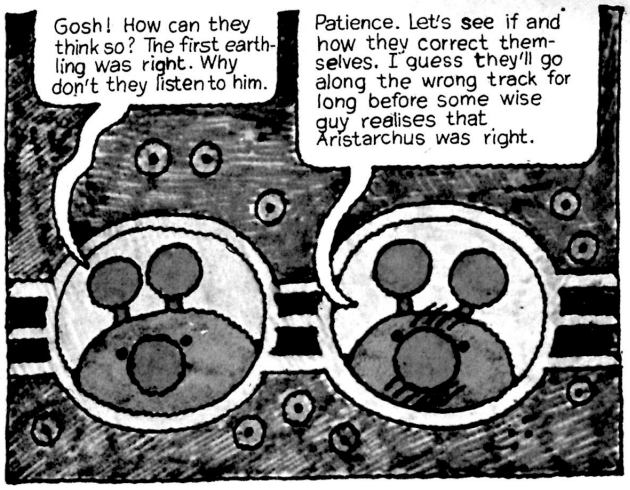
CHUCK

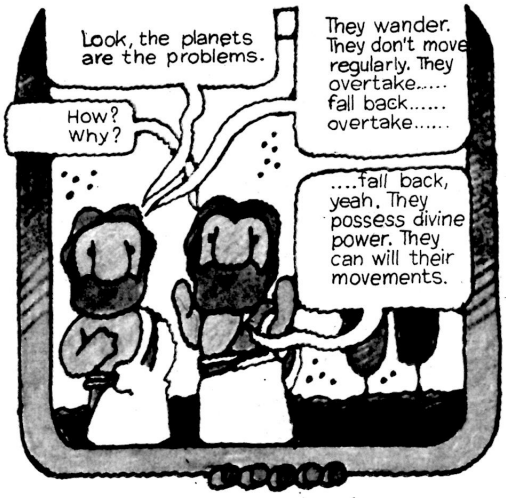
the handyman robot with marvellous synthetic intelligence has almost "natural" reasoning.

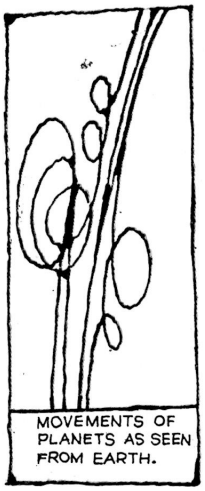


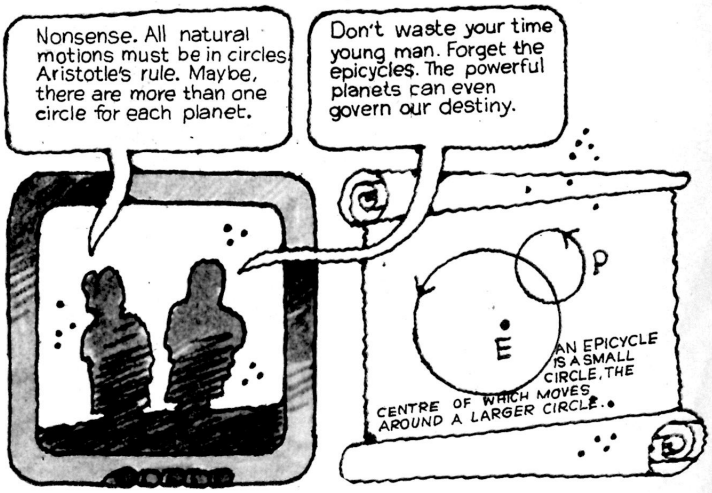


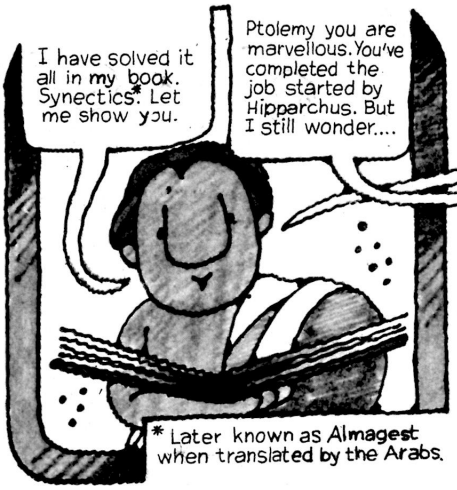


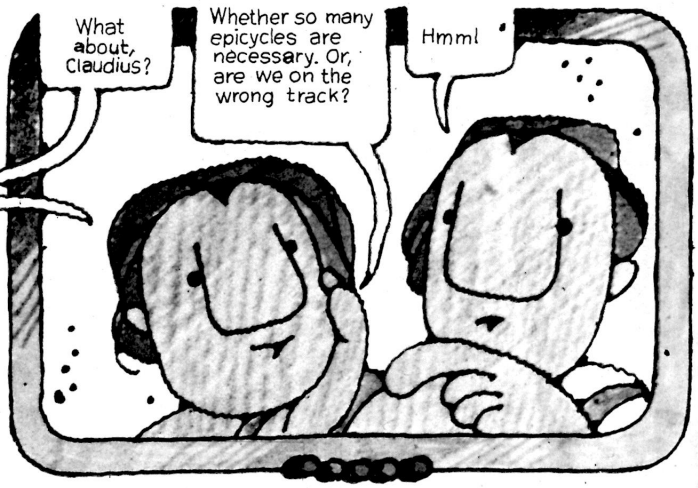


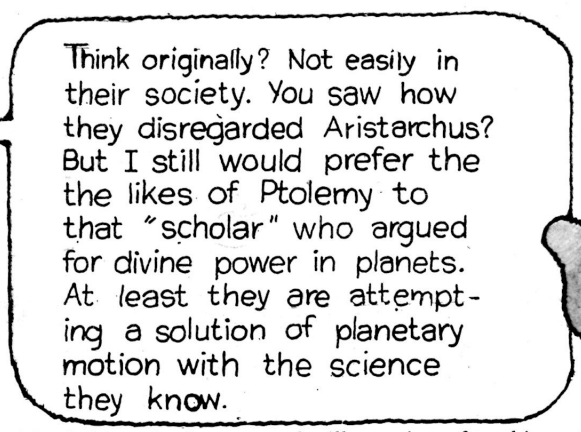


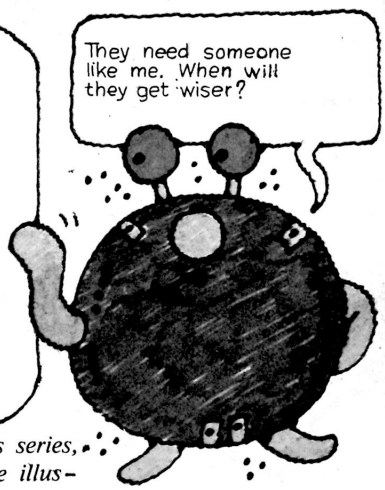












Mr. Sabir, who has done the illustrations for this series, is a well-known graphic designer and decorative illustrator from Bombay.
